

# mSuite

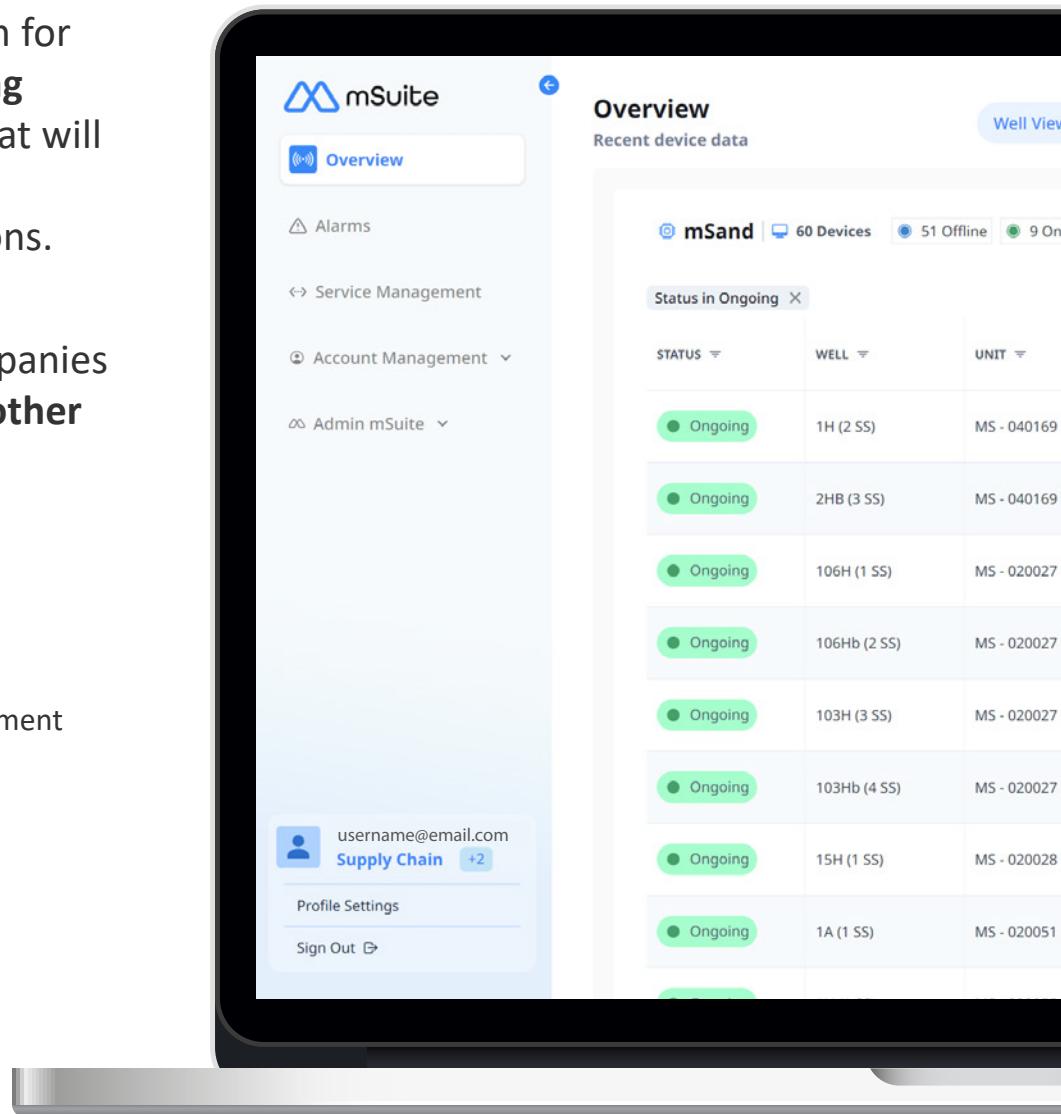

## Digital monitoring and control platform

mSuite is a digital platform for **monitoring and controlling operations in real time** that will allow you to improve the efficiency of your operations.

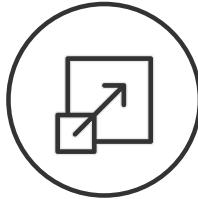

Our solution enables companies to **integrate devices and other data sources** relevant in a centralized platform.

### Main features

- Equipment and facilities management
- Service management
- Alerts and notifications
- Real-time data integration
- Dashboard and metrics
- Reports
- Remote control of devices

Simple and intuitive

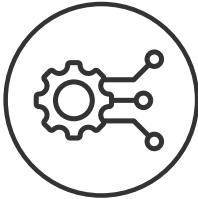

Scalable and flexible

Crossplatform access

Self-management of accounts

Automation

# mSuite

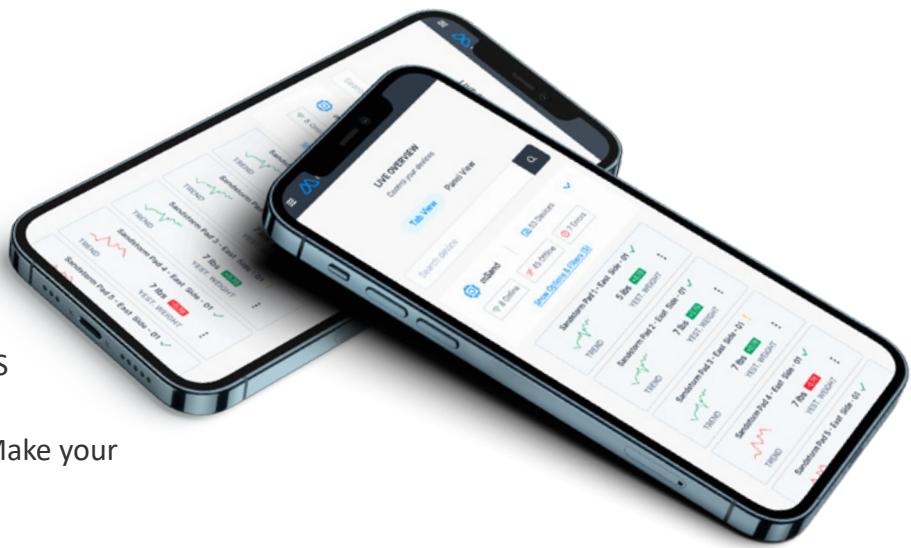

Digital monitoring and control platform

## Customized digital solutions

- Development team
- Agile methodology
- Scalable and flexible architecture

## Integrations

- Integrate your data in a single interface
- Communication protocols: MQTT, HTTPS
- Database: DB, S3, Blob, etc.
- Data management: Shared folders, API Make your data available through our API.

Technological stack developed with the latest technologies on the market:

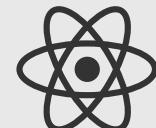

Infrastructure  
AWS 100% cloud

Timescale as a  
time series  
database  
manager

Auth0 as a security  
centralizer

Framework  
React JS

TypeScript
